About This Game

Saddle Up to Defend the Realm On Dino-back!

Once a humble farmer's child, you've been accepted into Queen Isobel's Rangers: brave knights who patrol the kingdom of Pascalia on scaly beasts. But just as you receive your own dino and begin your career as a knight-ranger, you discover evil forces are converging to destroy the Queen, and Pascalia itself.

DinoKnights is a 177,000-word interactive fantasy novel by K.T. Bryski, where your choices control the story. It's entirely text-based—without graphics or sound effects—and fueled by the vast, unstoppable power of your imagination.

Enemies and terrifying foes surround you: but whom should you fear most? The Dread Wizard Sargossa, raising an army of dead dragons, or an enemy much closer to the court—the Queen's own sister, Ermessen? And what about your burgeoning talent for magic? Will you hone your powers to save your village and fight Sargossa? With a dinosaur at your side and sword in hand—the realm's fate rests on you!

- Play as male, female, or non-binary; gay, straight, or ace.
- Choose one of six different dinosaurs as your steed, including allosaurus, triceratops, and velociraptor!
- Foil a palace coup—or join it, instead!

-
- Hit the training yard with your dino, or spend your time cozying up to nobles and mages.
 - Find love with the royal heir, a charming bard, or a powerful mage!
 - Discover your secret, magical heritage.
 - Fight to save your own home village from destruction.
 - Defend the poorest peasants, or win fame in Royal Tournaments.

Evil is waking, and Pascalia needs you. Will you and your dinosaur answer the call?

Congratulations!
You have purchased DLC Emperor Pack!

I've never played the board game, but I'm having a blast with this PC version. I've mostly just been playing the AI, but I do have some turn-based games going too.

I'm really surprised that the game is getting such negative reviews. The interface is a little clumsy, for sure, but it's manageable once you've gotten used to it. I am at nearly 18 hours already, after only a few days.

Everyone keeps saying that the game is a port from mobile. People have got hung up on this, and they are wrong. These days developers build games from the ground up, so that they can be released on multiple platforms all at once. It is not a port from a mobile platform, but a game build decision that makes it possible to actually release it cost effectively for them and at a reasonable price for us. It also means that players can compete together regardless of the platform they are playing on, which means multi player games have access to a much bigger player pool.

It seems that many reviewers here would prefer games developers to simply skip the PC market altogether.... The music is really freaking good. Played on a HTC Vive Pro

This crawling simulator (a 2 year old child moves faster) has on the surface good music and voice narration. The graphics on the VR version are terrible unlike the normal version which has reasonable graphics.

The snail pace of movement is worse than everybody has gone to the rapture and while i could deal with it in that game due to their being so much to explore this game was barren by comparison.

The only thing redeeming in this game is the aurora in chapter 4.. Boring and buggy.. In one word? Amazing! It has it all - Great puzzles, descent horror \ creepy atmosphere and the best ingenious unique locomotion system I have ever seen in VR (more devs should do this!). It's just great, and it's a free demo, I'm eagerly waiting for the full game, highly recommended!. Beautiful short visual novel about a boy who has trouble socializing at school but then makes an unexpected friend while doing his favorite hobby: picking up shells from the seashore. I won't say anything else to spoil. Very deep message hidden in it. Art reminds me of Ponyo from Miyazaki too.. Not enough plot, in both ways.

Is good Boss nice skins. Tsudoishi hoshi ga hitotsu ni naru toki, aratana kizuna ga mirai wo terasu! Hikari sasu michi tonare! Rimitto Akuseru Shinkuro! Shinka no hikari, Shingu Ku Doragon!!!. This game is a fun simulation of the decline of the USSR that balances the complexity of geopolitics and the fun of shaping the world to make an enjoyable, yet imperfect experience. The gameplay revolves around managing the spending of the USSR, maintaining international diplomatic relations, and gently stepping through domestic policy. This means you'll have to lose a few times before you start to get the hang of the game. The main flaws of the game, however, are the poor job done to explain what everything does (you won't figure out what funding something does until someone gets mad at you for cutting their pay) and the English translation, which is somewhat sloppy at times. At \$4.99 it's worth the buy but on sale it's especially worth picking up.. Ok to keep it short and simple. If you like idle games you will find this game appealing. If you do not like idle games stay away from it .

The game is pretty simple you are a coward but to still reap the rewards of dungeon crawling you hire soda addicts in the local bar to do your job. You can set the group on automatic mode or use their ability on your own. Playing the group on your own is pretty repetitive therefore i set it on automatic. It's a simple yet fun idle game :)

8/10. Fun. Unless your the Omegaladon.. I loved the game, so cute! Lovable characters and humorous, engaging dialogue. Definitely recommend playing it.

Only issue is I have no idea how to unlock the other love story paths aside from Cat's path, or maybe they yet to be released.. i wonder why im not allowed on trains anymore. Dragon Age (1-3) Mass Effect (1-3) The Witcher (1-3) Jade Empire and Venetica are the best RPGs I've played so far

What I like:

Venetica is a pretty good game and its landscapes are beautiful.

The tavern song is freakin awesome a real earworm everytime I think of Venetica I go like: Send my ships to the Islands far away bringing silk and gold and silver to the bay...

what I don't like:

Leon - the most annoying person in the game

. achievements hunt only. No strategy. Complete chaos. Not even worth \$1.00
