It's ok. Good graphics and immersive experience, but odd and disturbing little story. I'll give it a thumbs up, but only just.. The the Dash8-c is a good locomotive that Union Pacific, CSX, and Norfolk Southern still use some of these engines in service. Its great for long distance trains or local trains. Little time trial puzzle exploration game with nice graphic style and sound.

Positive:

- + graphics and sound
- +something different

Negative:

- first playthrough just took me 30 minutes, from now on it's only about improving timeVgold. I tend to play my games on highest settings at 1080p on my 4k monitor. My gpu just isn't quiet strong enough to play at 4k ... this have given me a little frustration as I get a greyish and blurry when doing this. I decided to try out Lossless Scaling and WOW, it makes a WORLD of difference. I play a LOT of Final Fantasy XIV Online and in only 6 hours of use this singlehandedly made my experience multiples better. The colors are so vivid! The blacks are so BLACK! No blurriness! Looks crisp as if I were playing at 4k! Thank you SO MUCH!!!!!!! 10/10 Stars!. I would not recommend this for kids. Or anyone. There are way too many bugs and the interface is not user friendly. There are bugs that cause your car to get stuck during the race. And it happens a lot. Sometimes you even get stuck between invisible things and must restart the race. A lot of cars can't be unlocked. It says 30 coins to unlock, you click, 30 coins are removed, but the car still isn't unlocked. It's either a bug or a horrible user interface. Getting the coins to unlock everything is way too easy. It's for kids yes, but if the game worked and a kid wanted to, he or she could unlock everything in 2 hours. Everything cost the same to unlock and there's no reward for winning a race. Furthermore, the other cars don't collect coins or diamonds so you can just crawl through the track and collect everything. That's what my kids were doing. And that obviously gets boring really fast. The interface has way too many similar looking buttons. It is not intuitive where you should click next. And some of the buttons doesn't do anything at all, it appears. To leave the game, you have to minimize and close it on the taskbar because it doesn't even have an "exit game" menu option. The game seems to have been rushed out and not tested on a single kid beforehand. It's a shame because the idea was good. So please update the game and fix the bugs.. I don't give a piece of crap if there's no multiplayer...this game deserves a thumbs up for its ahead-of-its-time gameplay and graphics and no nonsense campaign for single player....especially on sale. Drive tanks, humvees, helis, fly drones, snipe, do it all in any order you want.

Great game...no bugs.

\$5 on sale people.

Buy it, and enjoy it.. The will be English Edition later on.

The online requirement is due to anti-piracy, unlike Axxxxxxx's Creed which will set your CPU on fire.

This is the best Chinese single player ARPG game ever, one of the dungeons contains Dimensional transfer, transfer the 3D character into a 2D character, along with "Shadow play" (A.K.A. 影戏 in Chinese) Elements and Chinese Opera Dubbing, not sure if it's Peking Opera as I know little about Chinese opera. This Dungeon is super impressive.

Open Windows Media Player and put the visualizer on. Seriously, though, the game's concept is fun, but Symphony does it better without the deluge of choppy graphics and nonresponsive controls- and, most importantly, massive sound issues in the sound-based game.. pro
great idea of gameplay

cos

only 3 short mission

Not configurable mouse sensitivity, at moment is inplayable.. one of the most painful games i've ever played in my life.. never again... I only have two [severely minor] gripes about Last Dream.

- F12 Steam override; cannot take screenshots. F12 merely takes you back to the main menu without warning.

- 540x420 (estimated) windowed mode only. I am aware, however, that this is par for the course with any RPG Maker game. Even with my glasses, I sometimes have to strain to see what's going on, but whatever -- the gameplay is delicious, and I make do. ;)

Well done, White Giant. Best RPG Maker game I've ever played, hands down. Boundless items, great class selections, fun and engaging puzzles reminiscent of Lufia / Lufia 2 (SNES), and convenient point distribution systems for leveling and skills. The ability to choose the difficulty level, as well as the enemy encounter rate, is also extremely beneficial.. Absolutly terrible. Spent a couple minutes then deleted it as the controls were terrible and the ingame clock moves way too slowly.(this game come bundled with a lot of old and generally crappy games. Unbelievable cash grab.) Don't buy this garbage. I give it a 1.5V10.. eh pretty good would recomend it for just casuly lisghting to music and i know i cant spell also game good time waster. Very fun to play when your board and very easy to run!. 10V10

Pros: 1 handed gameplay

Cons: My load times are too short and frequent. I wish there were more to this series! These games were a lot of fun to play. I spent over 6 hours on this one, making it well worth the cost. The story line was great, the characters fun, and I loved the puzzles and hidden object scenes. I generally tend to skip through scenes but I didn't with this series because I enjoyed everything so much. I highly recommend if you like casual hidden object/adventure games!. its fun to play but very frusturating that i have to resart all over if i die and have to make an altar each time i do.
